

Pets
Unlimited

Pets Unlimited

Every Pet Parent knows it: true love has four legs. Like you, we are Pet Parents too. We understand the huge love we feel for our furry family members. For over 24 years, we have worked passionately and with great enjoyment on developing excellent pet products. High quality, healthy snacks and food made from natural ingredients - and packed with flavour and love. We are proud to present: Pets Unlimited.

Our mission

Pets Unlimited is a premium brand of the Petcare Business unit of the Dayes Group. According to us, there is no doubt that our pets are an integral part of life. They are very much part of our family. And, just as for our families, we want the best for them.

However, back in 1998, food and treats made with nutritious, balanced ingredients weren't readily available in the grocery stores. So we decided to put in the work ourselves. With a small team of pet parents, we made it our mission to develop healthy and responsible products that contribute to our pets' well-being and are accessible for everyone. During this process, we've been listening to our customers a lot and we have no intention to stop listening to their feedback, as it has become our passion to keep on developing even better products to keep up with our pet's needs. Because we believe that a happy pet contributes to a happy family.

Now, over 24 years later, our products are sold in more than 15 countries inside and outside of Europe. And we can proudly say that we have gained the knowledge and experience to offer high-quality, honest and reliable products for our pets.

Our Team

As pet parents, we couldn't find the right quality natural products in the supermarkets where we buy our products.

Our team consists of passionate product managers, who have in-depth knowledge of our products and assortments. Together with our dedicated buyers, they are always looking for innovative, healthy and responsible products. They are able to use their sourcing skills world wide, ensuring a competitive assortment with unique, high quality pet food, snacks and toys.

Next, our key account managers build and maintain close relationships with our partners and customers. They bring years of international pet care experience and great networking skills to the table. Because of this, we are able to create specialized products for different customers and countries.

And we cannot forget about our strategic planners, who oversee all planning, ordering and logistic processes. Their critical thinking and creative problem solving is key for our supply chain.

Lastly, our best friend, mascot and office dog Bailey completes our team. He taste tests all our products. It's an important job he takes very seriously. Bailey and our other pets motivate us and they inspire us.

We love our pets & have become **pet parents**

Our products: our promises

Natural ingredients

Grain free

High meat and fish content
